

[Features]

- Electromagnetic sensing, no moving parts or pressure loss
- Immune to viscosity, density, temperature and pressure
- For conductive liquids, including solids-laden wastewater
- RS485 standard Modbus communication protocol
- Teflon lining and Hastelloy C sensor resist corrosion, suiting most acids and alkalis
- Wide-range DC input with anti-interference circuitry for harsh environments
- Built-in display shows real-time flow on site

[Applications] Wastewater, chemical, dyeing, seawater and groundwater flow monitoring

[Model Selection]

MF — Code 1

Code 1	Size	Code 1	Size	Code 1	Size
15	1/2"	65	2½"	200	8"
20	3/4"	80	3"	250	10"
25	1"	100	4"	300	12"
40	1½"	125	5"		
50	2"	150	6"		

[Specifications]

Power Supply	DC 18~36V
Communication	RS485, Modbus RTU
Velocity Range	0.1~15 m/s
Resolution	0.5 cm/s
Accuracy	0.5 %
IP Rating	IP65
Temperature	0~80 °C
Lining Material	Teflon
Sensor Material	Hastelloy C

[Dimensions]
